

The 3rd International Symposium on Cosmic Rays and Astrophysics  
(ISCRA-2021)

Contribution ID: 42

Type: **Overview**

## Muonography of large natural and industrial objects

*Thursday, 10 June 2021 10:25 (25 minutes)*

The fundamentals of the muonography method are presented, and an overview of the main major experiments is presented. The results of modern muonographic studies in Russia, carried out on the basis of this method with the use of emulsion track detectors, are presented.

**Primary author:** POLUKHINA, Natalia (LPI RAS)

**Co-authors:** ALEXANDROV, A.B.; GALKIN, V.I.; GRACHEV, V.M.; GONCHAROVA, L.A.; VASINA, S.G.; KONOVALOVA, N.S.; MANAGADZE, A.K.; OKATIEVA, N.M.; ROGANOVA, T.M.; SADYKOV, Zh.T.; STARKOV, N.I.; STARKOVA, E. N.; TYUKOV, V. E.; CHERNYAVSKY, M.M.; SHCHEDRINA, T.V.

**Presenters:** POLUKHINA, Natalia (LPI RAS); SADYKOV, Zh.T.

**Session Classification:** Cosmo- and geophysical aspects of cosmic rays

**Track Classification:** Cosmo- and geophysical aspects of cosmic rays
