

ISCRA 2023

International Symposium on Cosmic Rays and Astrophysics

Information letter #2

The 4th International Symposium on Cosmic Rays and Astrophysics (ISCRA-2023) is organized by the National Research Nuclear University MEPhI (Moscow Engineering Physics Institute) and the Consortium “Cosmic Rays and Elementary Particles” under the auspices of the Scientific Council of the Russian Academy of Sciences on the complex problem “Cosmic Rays” and will be held on **June 27-29, 2023**.

The aim of the Symposium is a wide discussion of experimental and theoretical results obtained in actual research directions in the field of high energy cosmic rays and astrophysics.

The Symposium provides three types of presentations: **overviews** (30 minutes including discussion), **original** talks (15 minutes including discussion) and **posters** (A1, vertical). You can check the type of your talk in the interactive timetable or at the webpage of your contribution.

Contributions approved by the Programme Committee will be published in a peer-reviewed journal “Physics of Atomic Nuclei”.

To present a talk at the Symposium for participants from the Russian Federation, the expert and export findings on the possibility of its publication in the open access are required. Scanned copies of these documents must be sent to the e-mail of the Symposium Organizing Committee (iscra@mephi.ru). The originals must be provided to the Organizing Committee when registering for the Symposium at MEPhI.

We kindly ask you to upload your presentation materials to the Symposium website. It can be done at the webpage of your contribution. The PDF, PPT and PPTX formats of presentations are acceptable.

Important dates:

June 22	Publication of the preliminary timetable
June 27-29	Scientific sessions of the Symposium
July 15	Submission of the final versions of the papers
December 2023	Publication of papers in “Physics of Atomic Nuclei”
